

Partners Behavioral Healthcare

Partners Behavioral Healthcare provides substance use treatment, mental health services and medication assisted therapies to individuals throughout Minnesota. We are committed to providing a whole-person approach to healing and recovery through individualized evidence-based care.

We offer a wide range of treatment options, including intensive outpatient, outpatient programs, telehealth groups, mental health services, medication assisted therapy, and primary healthcare needs.

With 4 locations to choose from and unlimited telehealth options, we offer flexible appointments, a variety of group times, and no waiting lists.

If you or someone you know is looking for help, our team of behavioral health experts can provide the compassionate support and treatment you need.

Get Started

Assessments are available daily via phone, telehealth, or in person. Telehealth services are open to Minnesota residents 18 years of age or older.

To schedule an assessment call 651-378-3200. Patients may be referred to us directly from our HIPAA secure website at pirmn.com or fax to: 651-348-8349

- Mental Health Services
- Medication Assisted Therapy (MAT)

Telehealth options for all services.

Partners offers individuals with substance or alcohol use disorder a convenient way to access treatment services. With the addition of telehealth programming, we are expanding our reach and helping rural populations overcome shortages of specialized behavioral healthcare and resources. It is a convenient solution for individuals with transportation limitations, a lack of childcare, or other barriers to treatment.

Intensive Outpatient Treatment

Intensive Outpatient Treatment is a primary treatment program that can be recommended by a comprehensive assessment. Clients participate in group and individual therapy, while working on an individualized treatment plan. Treatment is supported by a multi-disciplinary team including LADC's, Mental Health Therapists (if needed), and Peer Recovery Specialists. Intensive outpatient programs occur in non-residential settings with clients living off-site in sponsored lodging if recommended or needed. Programming starts at 30 hours per week and is gradually reduced as clients work their way through our evidence-based curriculum.

Medication Assisted Treatment

Partners Behavioral Healthcare offers Medication Assisted Therapy (MAT) in our goal to provide a whole-person approach to the treatment of substance use disorders. MAT bridges the biological and behavioral components of addiction. Research indicates a combination of medication and behavioral therapies can successfully treat Substance use disorders and help sustain recovery. MAT has been shown to assist persons in recovery by improving quality of life, level of functioning, and the ability to handle stressors. MAT is evidence based and is a recommended course of treatment for opioid addiction and other limiting conditions.

Outpatient Treatment

Outpatient treatment offers more flexibility than intensive outpatient programming and allows participants to maintain work, family, and personal commitments. Participants can attend sessions in the mornings or evenings and are able to pursue their personal recovery goals. Length of time in treatment depends on a variety of circumstances that are unique to the participant, however most remain in programming for 12 to 24 weeks. Once in our program, our clinical professionals will perform ongoing assessments and provide referrals for additional services as needed.

Mental Health Services

Mental health services are available to all individuals seeking care for individual mental health needs. Co-occurring disorders can be diagnosed and treated at Partners for both current clients and others in the community. You do not need to be a current client to receive mental health services. Mental health services are available both in person and via telehealth.

Peer Recovery

Partners Behavioral Healthcare provides every participant with a Peer Recovery Specialist who has experienced addiction and is now experiencing recovery. Peer Recovery Specialists offer mentoring, assist with housing, transportation, employment, and guidance in navigating community support systems.
